

PRESS RELEASE

Chandra Asri Distributes 210 Tons of Liquid Oxygen to Support COVID-19 Patients

Jakarta, 15 July 2021 - PT Chandra Asri Petrochemical Tbk (Chandra Asri), the largest integrated petrochemical company in Indonesia, has provided 210 tons of Liquid Oxygen for hospitals in DKI Jakarta and Banten which will be distributed in stages within a month.

In supplying the liquid oxygen, Chandra Asri cooperates with PT Air Liquide Indonesia (ALINDO), a gas supplier company for industry and health. This liquid oxygen will be distributed mainly to Chandra Asri's Corporate Social Responsibility (CSR) reference hospital.

Erwin Ciputra, President Director of Chandra Asri stated that this liquid oxygen aid is a part of Company's effort to contribute to patients and hospitals who are currently in need of medical treatment.

The liquid oxygen aid, which is supported by the Ministry of Industry, is planned to be distributed to several units of Mayapada Hospital in DKI Jakarta and other hospitals in Jakarta and Banten which are members of the Indonesian Regional Hospital Association (ARSADA).

The cumulative number of COVID-19 cases has led to an increase in the need for oxygen. The Ministry of Industry has stated that it will increase oxygen production to 922.9 tons per day. Currently, the maximum national oxygen production capacity is recorded at 1,700 tons per day whose supply is expected to continue to increase to meet oxygen supply.

"We see that there is an urgent need for oxygen supply for COVID-19 patients due to the number of new cases each day. With collaboration between industrial sectors to support the availability of liquid oxygen, we hope to be able to help hospitals and health workers in their efforts to save COVID-19 patients," said **Erwin Ciputra**.

In addition to providing liquid oxygen assistance, since March 2020 last year, Chandra Asri through the Chandra Asri untuk Negeri program, has made efforts to overcome the COVID-19 pandemic with the support of thousands of medical and personal protective equipment such as hazmat suits, masks, and medical gloves, also the set of rapid antigen tests given through the Regional Head, BNPB and hospitals.

Meanwhile, **Jonathan Tahir, as Group CEO of Mayapada Healthcare** mentions, "The recent growth in Covid-19 cases has an impact on the crisis of medical oxygen supply in all hospitals throughout Indonesia, especially in hospitals and emergency health facilities that treat Covid-19 patients. 19 and is in dire need of oxygen. We are grateful for Chandra Asri's support in providing 90 tons of liquid oxygen for Mayapada Hospital. We believe this will greatly help patients in need as well as medical efforts in rescuing COVID-19 patients. Mayapada Hospital is fully committed to assisting the government in handling this pandemic as much as possible in terms of health services in all of our hospital units."

Data from the Ministry of Health states that the demand for medical oxygen gas in Indonesia is currently more than 1,000 tons per day. Whereas previously it was only about 400 tons per day or 25 percent of

Chandra Asri

the total production of oxygen gas in Indonesia. However, given the ongoing increase in cases, the government anticipates the need for oxygen to increase to 2,600 tons per day.
