### SECTION-4. FIRST-AID MEASURES

The Health effects below are based upon component health effects consistent with requirement under OSHA hazard communication (29 CFR 1910.1200).

#### First-Aid Step

Inhalation	: Product fines may cause mechanical irritation
Skin Contact	: Product is unlikely to cause irritation at room temperature
Eye Contact	: Product fines may cause mechanical irritation
Ingestion	: Product is practically non-toxic
Sign and Symptoms	: Irritation as noted above
Aggravated Medical Condition	: Preexisting eye and respiratory disorder may be aggravated by exposure to product fines

### SECTION-5. FIRE-FIGHTING MEASURES

Extinguishing Media	: Use water fog, foam, dry chemical or CO <sub>2</sub> .
Unusual Fire and Explosion Hazard	: Treat as a solid that can burn, molded parts generally burn slowly with a low smoke density and flaming drips under certain conditions can burn with a high smoke

Fire Fighting Procedures and Precaution	:	density Material will not burn unless preheated. Do not enter confined fire space without full bunker gear (helmet with face shield, bunker coats, gloves and rubber boots) including a positive pressure NIOSH approved self-contained breathing apparatus. Cool fire exposed containers with water.
Protective Clothing for Fire Fighter	:	Hand gloves, goggles

#### **SECTION-6. ACCIDENTAL RELEASE MEASURES**

Small Spill and Leak	:	Pellets on the floor could present a serious slipping problem. Exercise good housekeeping to avoid this hazard. Sweep, shovel or vacuum material into clean containers.
Large Spill and Leak	:	Use a shovel to put the material into a convenient waste disposal container do not allow any potentially contaminated water with pellets to entry any waterway, sewer or drain.

#### **SECTION-7. HANDLING AND STORAGE**

Personal Precautionary Measures	:	Avoid contact with molten material
Handling	:	Maintain good housekeeping. Keep away from heat, sparks, open flame or any ignition source. Use with adequate ventilation. After handling, always wash hands thoroughly with soap and water. Spilled pellet may create a slipping hazard. Electrostatic charge may build up during handling. Grounding of equipment is recommended.
Storage	:	Store in a dry place with adequate ventilation and away from direct sunlight, excessive heat and strong oxidizers. Keep packaging (container) closed to prevent contamination

#### **SECTION-8. EXPOSURE CONTROLS / PERSONAL PROTECTION**

Control Parameters	:	Although general room ventilation should be adequate in most applications, local exhaust ventilation is recommended for control of airborne dust, fumes and vapors, particularly in confined areas.
Respiratory Protection	:	Use NIOSH approved respirator if unable to control airborne dust, fumes and vapors.
Eye Protection	:	Wear eye protection (safety glasses, goggles, face-shield) when processing.
Skin and Body Protection	:	Wear chemical-resistant gloves, heat protective gloves and protective clothing as well as a face-shield
Other Personal Protection	:	Use safety non-slip shoes in area where spills or leaks occur.

#### **SECTION-9. PHYSICAL AND CHEMICAL PROPERTIES**

Appearance and Odor	:	3mm ø Solid, Whitish in color and essentially odorless pellet
Organoleptic	:	Tasteless
Melting Point / freezing Point	:	125 – 138°C / Not applicable
Initial Boiling Point	:	Not applicable
Flash Point	:	Not applicable, Combustible solid
Evaporation Rate (n-Butyl Acetate = 1)	:	Not applicable
Specific Gravity (H <sub>2</sub> O=1)	:	<1.0

#### **SECTION-10. STABILITY AND REACTIVITY**

Stability : Stable under normal operating conditions of storage, handling and use.  
Hazardous Reaction : Not likely to occur under normal operating conditions of storage, handling and use  
Conditions to Avoid : Strong oxidizing agents. Temperature over 300°C, sparks and open flame.  
Hazardous Decomposition : Thermal decomposition products are highly dependent on the combustion  
Products conditions. A complex mixture of airborne solid. Liquid particulates and gases will evolve when this material undergoes pyrolysis or combustion. Carbon monoxide and unidentified organic compounds may be formed upon combustion

#### **SECTION-11. TOXICOLOGICAL INFORMATION**

Symptoms related to toxicological characteristic : Material is considered essentially inert, non-toxic and practically not harmful as well as not hazardous substances under RoHS regulation. Exposures to high levels of dust or heated fumes may cause irritation.  
Carcinogenicity : Material is not carcinogenic as listed by OSHA, NTP or IARC

#### **SECTION-12. ECOLOGICAL INFORMATION**

Ecotoxicity : Material is not expected to be harmful to aquatic organisms  
Environmental Fate : Material is not volatile, insoluble in water, and resistant to biodegradation  
Mobility : The product has low soil mobility. This material floats on water.

#### **SECTION-13. DISPOSAL CONSIDERATIONS**

Waste Disposal : Place in an appropriate disposal facility in compliance with local regulations

#### **SECTION-14. TRANSPORT INFORMATION**

Transportation Classification : Not controlled under DOT (USA), TDG (Canada), ADR (Europe), IMDG and IATA
